Team Project, Milestone2, main Java FX GUI interface

- Due Apr 25, 2019 by 10pm
- Points 20
- Submitting a file upload
- File Types zip and jar
- Available until Apr 25, 2019 at 11:59pm

This assignment was locked Apr 25, 2019 at 11:59pm.

Milestone 2: is due before 10pm on Thursday, April 25th.

design.pdf - Sample Design Document for Team Project (link will be added after Milestone #1 is completed) [Links to an external site.](#)

Team Project Objectives

- work together in a performing team [Links to an external site.](#)
- [Click here for tips to use Git, Eclipse, Java FX, for your Team Project Work Flow](#)[Links to an external site.](#)
- design a multi-class GUI program
- implement that program using Java FX
- consult with a TA regarding design and implementation choices
- complete a medium sized project

A-Team

[ATEAM create and join an ATEAM](#) [Links to an external site.](#)

Note: This should already have been completed prior to submitting milestone #1

Students who complete the assignment individually or with less than 4 persons will lose points.

Description

Get an initial GUI page to display for this problem: [Team Project -- Quiz Generator](#)[Links to an external site.](#)

The GUI (20pts)

Submit a program that displays a GUI that shows the main view that the user will see for your program. If the initial view is instructions or a login screen be sure that your program works past that point for us to see the main layout of your user interface.

The UI does have to show a question topic list, but that list may be hard-coded for this milestone if reading from a file is not yet functional. Be sure to include labels, status messages, and or instructions to the user as may be required.

Points will be awarded based on Nielsen's <https://www.nngroup.com/articles/ten-usability-heuristics/> ([Links to an external site.](#))

Since full functionality is not yet required, we will focus on aesthetic and completeness of your interface at the start.

Here are all of our pages to help you complete your JavaFX GUI. Be sure you have completed: [p5 MyFirstJavaFXLinks to an external site.](#)

- [JavaFX on a CS Linux Workstation Oxygen.2 \(4.7.2\)Links to an external site.](#)
- [JavaFX Eclipse Create MyFirstJavaFXLinks to an external site.](#)
- [JavaFX Eclipse Edit MyFirstJavaFXLinks to an external site.](#)
- [JavaFX compile and run your Java FX program on a CS Linux WorkstationLinks to an external site.](#)

Submit

team.zip (details in link below)

[BUILD Team Project team.zipLinks to an external site.](#)

Include your x-team number in the submit upload comment if your a-team contains the members of your x-team.

Expected Grading Rubric

- 1pt - worked in a-team with 4 or more members
- 1pt - work submitted correctly and before due date and time
- 10pts - all required components present in GUI
- 8pts - layout is clear and intuitive to the user

Rubric

Title:

Keep in mind that 463 students have already been assessed using this rubric. Changing it will affect their evaluations.

Milestone #2: QuizGenerator

Criteria	Milestone #2: QuizGenerator	Ratings	Pts
